Coloring Fun

Following color directions

Color the picture following the directions, then use your imagination to color the areas that are not marked.

Make a simple bar graph of the basic colors on a piece of paper.

yellow	red	blue	green	orange	purple	brown

Next, take a walk around your neighborhood with your child and look for these colors. Record in pencil how many red objects you see, blue objects, and so on. When you get home, instruct your child to color in the bar graph.
