Label and Color the Animal and Plant Cells:

N	lame	•			
١,	ıaıııc				

Ribosome

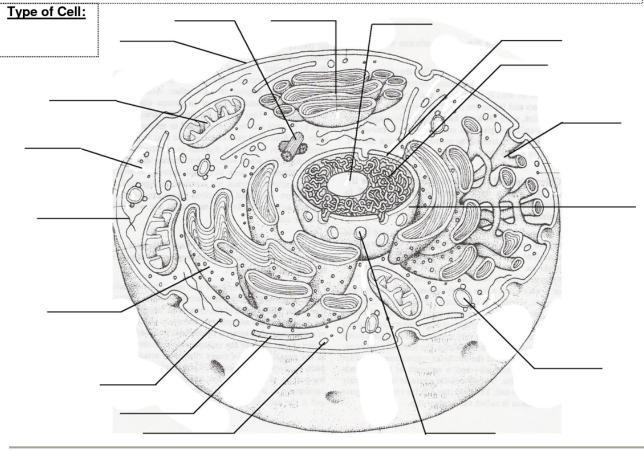

Centrioles

Label each cell using all the terms in the boxes, then color each structure in a different color. Beside each structure's name in the boxes, either write the color you used or draw a line through it using that color.

Cell (plasma) membrane Nucleus Nuclear envelope Nuclear pore Nucleolus

Chromatin Cytoplasm Mitochondrion Golgi Apparatus Vacuole Lysosome Microtubule Microfilament

Smooth Endoplasmic Reticulum Rough Endoplasmic Reticulum
