

# CARDINAL FLOWER

*Lobelia cardinalis*

*Plant Family:*  
*Bellflower | Campanulaceae*

*Clump forming perennial with alternate leaf branches featuring cardinal (red) tubular flowers. At times one can find the flowers in rose shades, or white. The leaves are a dark green color. This plant grows in moist, and low wooded areas, growing to a height of about 2-3 ft. It enjoys afternoon shade but can withstand sunny areas. The bellflower attracts hummingbirds and butterflies and is a lovely addition to any garden!*
